

Plus Point Partners – Our Focus on the Federal Government

Plus Point Partners, LLC provides leadership, experience, wisdom and knowhow that spans four decades to deliver on the management challenges faced by managers of large scale government programs in defense and civilian agencies. We have conceived, designed, and executed the delivery and management of major government systems of complexity and importance that managed billions of dollars and were mission critical to the operational support and defense of our country.

The issues, magnitude and complexities faced by program managers today are similar; however, the pace at which success is measured has increased exponentially due to increased transparency and the public's access to information. Successful delivery is still dependent on being able to implement on relevant technology platforms involving large numbers of people located in multiple cities across a wide variety of functional areas.

To facilitate the delivery of these systems the principals of Plus Point Partners built and managed companies to accomplish what had to be done. These companies grew from just a few initial employees to eventually employing hundreds of employees located across the US and international locations. Technology was invented to support an efficient development process with training curriculum and course material to support the implementation of hundreds of application programs spanning budget planning, financial management, personnel and payroll, inventory control and large scale equipment installation and maintenance of government systems.

Plus Point Partners is engaged by emerging security technology, technical service and professional service companies that serve the federal government. Together we assist organizations and provide guidance to facilitate their corporate development life cycle. Management, financial and technical resources are properly aligned to maximize the Plus Point Partner Team's ability to deliver a dynamic and creative set of solutions to meet the needs of our respective government customers.

Plus Point Partners is impacting the government by partnering with experienced, quality, highly skilled, specialized businesses to successfully provide essential solutions to agencies of the federal government. Through the consolidation and integration of the capabilities of these companies and the engagement of additional experts from across a range of technology and management disciplines, Plus Point Partners provides assistance to senior government managers in their quest to accomplish their missions.

As entrepreneurs who have delivered innovative efficient results to many federal program managers, Plus Point Partners continues to focus on providing cost effective,

Working with Plus Point Partners will be game changing for your organization!

responsive, refined technology, management and financial solutions to the Federal government.

A service disabled veteran owned small business (SDVOSB), Plus Point Partners' top priority as part of our growth strategy is to hire other service disabled veterans. Part of Plus Point Partners mentoring program is to provide new opportunities for those who have served in the defense of our country.
